PROJECTS

Virtual Keyboard

Developed a touchless virtual keyboard using OpenCV that allows users to interact with on-screen keys through hand gestures captured by a webcam. Implemented real-time hand tracking, gesture recognition, and keypress detection to enhance accessibility and provide a hygienic, contact-free input method.

Gen AI (Document Companion)

Developed an AI-powered document companion using Python and FastAPI that allows users to upload documents (PDF, DOCX, TXT), extract text via Apache Tika, and perform intelligent summarization and question answering using the LLAMA3 language model.
